

Creating a Course Link

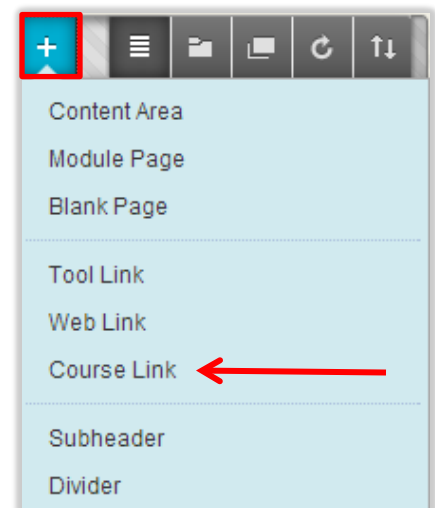

Introduction

Course Links are direct links to content also available in other Content Area within the course space that you do not want students to miss. Course links also provide the opportunity to link to content that might be located in pools of other content you may not want students to see. (For example, create a course link to link back to something located in the courses content collection which is only viewable by the course instructor.) Course Links enable instructors to create a shortcut to an existing area, tool, or item in a course.

Step 1: Once in the course space, make sure Edit Mode is ON.

Step 2: Once the “+” symbol appears atop the course menu, click to view a list of items to be added.

Step 3: Select **Course Link**.

Step 4: Browse the course space for the destination of which to link to. **Name** the Course Link.

Add Course Link

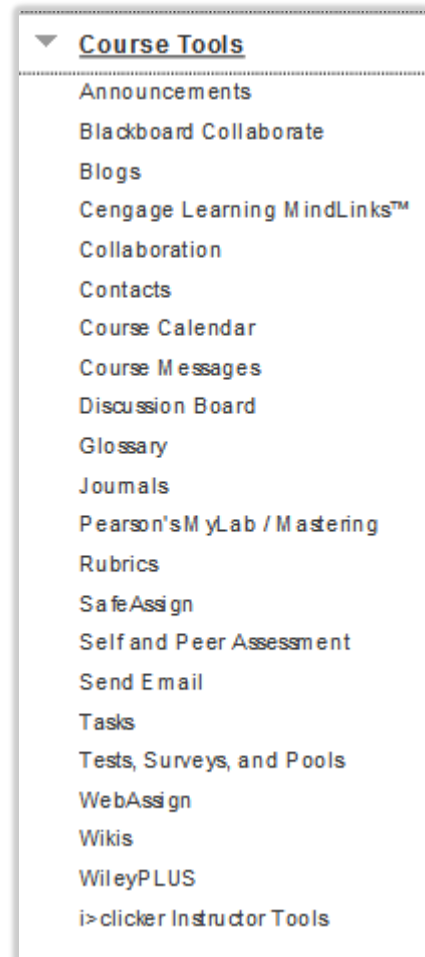

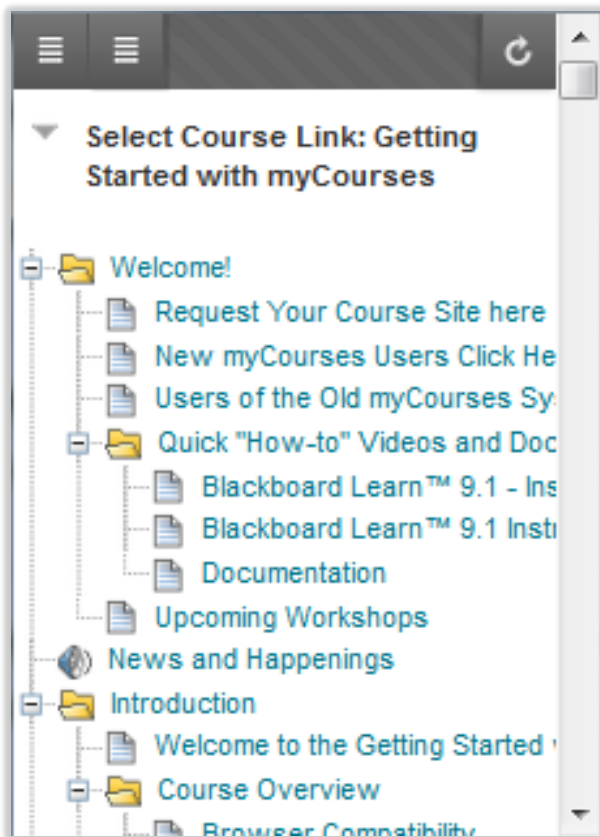

* Location: **Browse**

* Name:

Available to Users

Cancel **Submit**

Step 5: Be sure to select **Available to Users** then click **Submit**.

Conclusion

We hope this guide was helpful.
