

Creating a Module Page

Module Pages act as a central location for students where support information and course updates appear. You will only need to create one of these pages per myCourses site and they are typically set as the course entry point.

Step 1:

Click the **[+]** button in the top-left corner of the course menu and choose **“Module Page”** from the menu that appears.

Step 2:

Name your Module Page **“What’s New.”**

Step 3:

Click your new **“What’s New”** link on the menu and then click on the **“Add Course Module”** button.

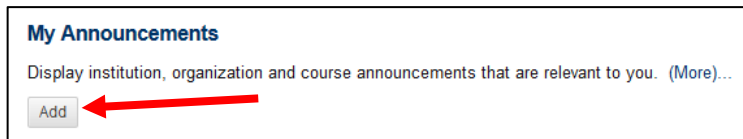

Step 4:

Here at UMass Dartmouth we recommended clicking the “Add” button underneath the following modules:

- My Announcements
- What’s New
- Quick “How-to” Tutorials
- UMass Dartmouth Support Services

Feel free to click on any of the other modules if you would like to check them out.

**Step 5:**

Once you have added all of the modules you want on the page, click the “OK” button in the bottom-right corner of the page.
