

My Courses Updates

Cloud Storage

Instructors can copy files from their favorite cloud storage solutions when authoring Content Items or creating Assignments. Students can submit assignments from their favorite cloud storage solutions. Cloud storage that is supported includes OneDrive, OneDrive for Business, Google Drive including G suite accounts, Dropbox, and Box.

Record Feedback

An instructor or grader can create personalized feedback recordings for individual gradable item attempts or manual gradebook items. Each recording can be up to 5 minutes long and can be both video and audio.

Collaborate in Groups

Collaborate is now available as a tool in Groups for easy collaboration. Session creation is limited to members of the group.

Discussion Board

Users can now sort by Replies to me in the Discussion Board for easier sorting in large discussions.

Total Posts	Unread Posts	Replies To Me
3	3	0
0	0	0

Grading

Cleanup: Instructors can now delete several columns at once out of the Grade book.
Anonymous Grading: Instructors can now grant an additional attempt for scenarios when the student needs one and the prior attempt can't be cleared because it is in an anonymous state.

Accessibility improvements

When a user first logged into MyCourses, an overlay appeared on the screen to highlight key navigation elements. The overlay caused a frustrating user experience for those using assistive technologies and has been removed to improve overall accessibility.

Box Assignment

The ability to download annotated assignments for both students and instructors from Box has now been added.

Fixes

Safari and Assignment submission: Papers submitted using Safari now do not have an error associated with the submission
