

Creating a Module Page

Every myCourses site should have one Module Page (usually named Tech & Support Services) where support information and course communications are housed.

[Watch video tutorial: Creating a Module Page](#)

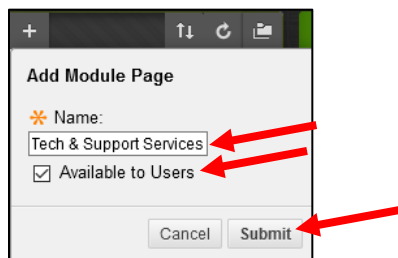

Step 1:

Click the **[+]** button in the top-left corner of the course menu and choose **“Module Page”** from the menu that appears.

Step 2:

Name your Module Page **“Tech & Support Services”**.

Step 3:

Click your new **“Tech & Support Services”** menu link and then click on the **“Add Course Module”** button.

Step 4:

Click the “**Add**” button underneath the following modules:

- myCourses Technical Support
- UMass Dartmouth Support Services
- University Academic Policies

**Step 5:**

Once you have added all of the modules you want on the page, click the “OK” button in the bottom-right corner of the page.

That's it - your module page has been created. You won't add any content to this page, it just serves as a resource for your students.
